Dim Connection

Push Dim
0~100% Dimming

Short press to on/off, long press to dim.

A close-up photograph of a person's index finger pressing a rectangular button on a white control panel. The button has a black border and the word "OFF" printed in the center. The panel is mounted on a light-colored wooden surface.

- On/off control: Short press.
- Stepless dimming: Long press.
- With every other long press, the light level goes to the opposite direction.
- Dimming memory: Brightness will be the same as previously adjusted when turning off and on again.

Quick options: DIP switch for 8 optional currents' quick selection(see the table below).

								ON	OFF
200mA	350mA	500mA	600mA	700mA	900mA	1050mA	1200mA		
10-54V	10-54V	10-54V	10-54V	10-52V	10-40V	10-35V	10-30V		

* After current setting by DIP switch, power off and then power on to make the new current effective.

* E.g. LED 3.2V/pcs: 10-54V can power 3-16pcs LEDs in series, 10-30V can power 3-9pcs LEDs, the max quantity of LEDs in series will be subject to the actual voltage of LED.
